DATA CENTER OF MAINE ONE GETS IT 1ST SAP HANA CERTIFICATION

HIGH QUALITY CLOUD

Paris, Washington DC, 11.08.2016, 16:38 Time

USPA NEWS - MainOne the premier connectivity and data center Solutions Company, today announced that its Data Center subsidiary, MDXi is now an SAP-certified provider of Infrastructure Services for SAP® solutions. This new certification confirms the ability of the company to deliver high-quality cloud.

MainOne (www.MainOne.net), the premier connectivity and data center Solutions Company, announced that its Data Center subsidiary, MDXi is now an SAP-certified provider of Infrastructure Services for SAP® solutions. This new certification confirms the ability of the company to deliver high-quality cloud and infrastructure operations services for customers running SAP (www.SAP.com) solutions and recognizes the company as the region´s first SAP Certified Data Center.----------
THE CERTIFICATION WILL ENABLE MDXI TO HOST AND MANAGE SAP UTILIZATIONS----------
The certification will enable MDXi to host and manage SAP applications utilizing the company´s enterprise cloud platforms, across its private, public and hybrid cloud solutions, via a consumption-based delivery model. As a SAP-certified provider of hosting services, MDXi will offer a cost-effective yet reliable delivery model for mission-critical applications for customers of SAP. SAP customers that rely on MainOne´s data center for hosting services will be empowered to focus on the business value of their solutions and benefit from reduced operational expenses that a commercial data center provides.

Receiving the certificate, the Chief Executive Officer of MainOne, Funke Opeke stated "We are pleased to receive the SAP certification for Infrastructure Operations Services, as it validates our commitment to providing world-class data center and cloud solutions in Nigeria. With this certification from SAP, it is now possible for Nigerian enterprises and businesses to host SAP applications in-country on MDXi´s Cloud platform and optimize their accounting processes, data analytics and sales chain management. This will improve response times for SAP applications, ensure data security and assure more cost effective subscription charges“.

In his comments during the certificate presentation to MDXi, Managing Director of SAP West Africa, Kudzai Danha said “More than ever, SAP Africa is excited about the SAP HANA® certification of partners like MainOne. The current market demand for attractive business applications in the cloud presents great business opportunities and through SAP HANA®, customers can innovate and redesign business processes, capitalizing on the agility of this unique platform.“
SAP HANA® CLOUD IS AN IN-MEMORY PLATFORM RUNNING ANALYTICS----------Cloud is an in-memory platform that runs analytics applications smarter, business processes faster and data infrastructures simpler! It is the foundation for all the data needs of a business, removing the burden of maintaining separated legacy systems and siloed data, so business can run simple in this new digital economy. The SAP certification process is rigorous and culminates with an onsite audit session to determine that the provider meets all the local and global requirements as stipulated by SAP to run its applications. Some of the criteria include quality and knowledge management, data center, network and connectivity, back up and data recovery, IT service management and project management. In order to meet this certification requirements, MDXi demonstrated its professional competence in all aspects of infrastructure operations including possessing a comprehensive operations manual, system landscape diagrams, security guidelines, OS access, required technical skills amongst others.
